

Inventory Control

Stock Management

Mobile inventory management allows you to better manage your stock by scanning items and capturing data on-the-move. Increase inventory accuracy, reduce shrinkage and better manage your cash flow.

Information is exported to a CSV file and easily integrated into most back end systems.

Modules:

- ✓ Receiving
- ✓ Price check
- ✓ Stocktake
- ✓ Transfers

Stocktake application interface showing fields for Location (Warehouse), Stock (311101), Supplier (AG Food Stuff Co.), Bin No (S1), and Quantity (802). The interface includes a numeric keypad and buttons for Add, Un Do, Save, and List.

Bundle includes:

- ✓ CK3 mobile terminal
- ✓ Comms cradle, power supply, cables
- ✓ Stocktake application
- ✓ CSV file export
- ✓ Level one help desk support
- ✓ *Custom software and integration available – call for more information*
