

PM75

RUGGED MOBILE COMPUTER STREAMLINED FOR ENTERPRISE MOBILITY

An enterprise device built with and for efficiency

Fast, powerful, and rugged: PM75 is cut out for these three ideals, while maintaining a light and ergonomic body. The Android device provides a powerful scan engine, comfortable grip, long-lasting battery, and seven-long years of update support—all of which are the essential components for building a great and versatile rugged mobile computer.

Fine-tuned hardware for the best operating system

Qualcomm's 2.0GHz processor runs the device smoothly with the help of 3GB RAM / 32GB ROM (opt. 4GB / 64GB). PM75 comes with two scan engine options (N3601 or N6603) to match your business needs. The Android 11 operating system offers efficient battery management, easy navigation, and the best data security among any existing mobile operating system. Both the hard parts and software are carefully tuned for each other, enabling PM75 to run the latest powerful solutions effortlessly. EmKit T M , Point Mobile's unique set of tools for businesses, is pre-installed for easy bulk deployment, management, and increasing productivity.

Designed for tough handling and low maintenance

The bright 5.45in HD+ (720 x 1440 pixels) display helps users to see and control PM75's interface without difficulty even under the sunlight. The device withstands multiple drops to concrete from 1.5m (5ft) height and has an IP65 water/dust resistance rating, in addition to the protection from scratches by adopting Gorilla Glass: ready to operate in one of the harshest working environments.
